## MANGO PULP

Keventer uses two varieties of mangoes to produce its superior quality mango pulp - Alphonso and Totapuri. Alphonso, with a warm sweet taste is sometimes pleasantly tart. It is considered one of the tastiest fruits of India because of its rich aromatic flavour. Totapuri is a perfect blend of sweetness and acidity. Both Alphonso and Totapuri are excellent sources of Vitamin A and C.

### Totapuri & Alphonso Single Strength

Fruit Pulp	Mango Pulp-Alphonso		Mango Pulp-Totapuri

Quantity per 20' Container	<b>80 Barrels</b>

Season – June to July

# GUAVA PULP

Keventer is one of the largest exporters of fruit pulp in India and guava pulp is a prominent product in its range. Guava pulp is obtained from ripe guava fruit, one of the highest sources of Vitamin C. Guava pulp has got good potential as commercial source pectin and is used mainly for conversion into juices, jams, fruit cheeses, fruit bars etc. It is also used to flavour ice creams, puddings and yogurts.
